BIBS DELIVERY

1. REGISTRATION CODE VALIDATION (CHECK-IN)

Only the registered runner may pick up their packet. You must present your confirmation code and an official photo ID (Passport, INE). This ensures that the runner picking up the packet is the person participating.

*For underage runners (**Norawa 9K, Napurega 21K** y **Komakali 39K**) It will be necessary to present a copy of the CURP to verify your identity. A signed consent letter from a parent or legal guardian must also be presented.

2.BIBS AND DROP BAG DELIVERY

You will receive your official BIB, drop bag and numbers to mark your bag.

RARÁMURI 118 KM 100M

1 Drop Bag &
1 Gear Check Bag

WERIGA 93 KM 100K

1 Drop Bag &
1 Gear Check Bag

AKÁA 58KM 50K

KOMAKALI 39KM 50K

NAPUREGA 21KM 20K

NORAWA 9KM

1 Gear Check Bag

3. WRISTBAND AND CREW ACCREDITATION

Once the race bib is collected, a volunteer will place the identification wristband corresponding to your distance, along with an accreditation pass (armband) for a family member or friend who will assist you during the race (**Rarámuri 100M** and **Weriga 100K**).

4. WELCOME KIT

We will hand out the welcome kit, which includes the official event T-shirt and sponsor items.

5. MANDATORY GEAR CHECK

Runners in the **Rarámuri 118K**, **Weriga 93K**, **Akáa 58K**, **Komakali 39K** y **Napurega 21K** distances must present their mandatory gear for inspection.

The **Norawa 9K** distance will have its mandatory gear check on race day, prior to entering the start corral.

RUNNER SHUTTLES

The Organizing Committee will provide free shuttle service for athletes in the following distances:

DIVISADERO TO CEROCAHUI SHUTTLE
RARÁMURI 100M. WÉRIGA 93K

Runners must confirm their preferred schedule for the shuttle from Divisadero to Cerocahui through their MyUTMB account in the My Dashboard section.

To ensure a great experience and avoid delays on race day, please note that the official shuttle service provided by the organizing committee to the start line for 100M and 100K runners is mandatory for all participants. There will be no alternative options for private vehicles. This helps us keep the race route controlled for better flow during the competition.

DEPARTURE LOCATION:
PARQUE BARRANCAS, DIVISADERO

SEMI-AUTONOMY DURING THE RACE

The principle of an individual semi-autonomous race is the rule. **Chihuahua By UTMB® 2026** events take place in a single stage, at an undefined pace, within the maximum time limits specified for each event. Semi-autonomy is defined as the capacity to be autonomous between aid stations, both in terms of food and in terms of clothing and safety, allowing adaptation to encountered or foreseen problems (bad weather, physical issues, injuries...).

This principle implies, in particular, the following rules:

1. Each runner must carry all mandatory equipment with them throughout the entire race. Carrying this equipment is mandatory at all times. It will be checked during bib distribution and cannot be changed along the race route. At any point on the course, race officials may verify the pack and its contents. The runner is required to submit to these checks in good spirits, under penalty of disqualification from the race in case of refusal.

For more information, please consult the mandatory equipment section for each distance.

2. Aid stations offer food and drinks to consume on-site. The organization only provides still water or isotonic drinks to fill water bottles or hydration packs. Upon leaving each aid station, the runner must ensure they have the necessary amount of food and drink to keep going until the next aid station.

For slower runners, the longest sections without drinks could take more than 4 hours.

3. For **RARÁMURI 100M** and **WERIGA 93K**, one duly accredited support crew member is permitted exclusively at certain aid stations (*), in a zone specifically reserved for this use and at the discretion of the aid station manager. Only one person can provide assistance without specific equipment, using only a bag with a maximum volume of 30 liters containing the equipment chosen by the runner. Assistance provided by professionals or any external doctor/paramedic not affiliated with the organization is strictly forbidden. The rest of the aid station is strictly reserved for runners. Assistance is not permitted on any section of the race route that is not part of the authorized assistance points.

4. It is forbidden to accompany or be accompanied along any part of the race route by a person not registered in the race and outside the clearly marked tolerance zones near aid stations. *It is strictly forbidden to be accompanied by a dog or any other animal.

5. A participant who agrees to be accompanied outside the expressly designated zones violates the principle of semi-autonomy. Race officials who witness irregularities are authorized to penalize participants to guarantee the spirit of trail running events.

(*) **Personal assistance is allowed at the following aid stations:**

RARÁMURI 100M:

> 20KM GALLEGO
> 62.5Km GUITAYVO
> 79km PANORAMICA
> 91.5Km PARQUE
> 104.5Km HUERACHI

* *Controlled access only during the hours established by the park.*

WERIGA 93K:

> 20km gallego
> 62.5 guitayvo
>79km panoramica

* *Controlled access only during the hours established by the park.*

Assistance is strictly prohibited at all other aid stations, as well as at any other point along the race course.

AKÁA 58K, KOMAKALI 39K, NAPUREGA 21K AND NORAWA 9K Assistance is NOT permitted at any point during the race.

PACERS ARE NOT ALLOWED DURING THE RACE FOR ANY DISTANCE

SAFETY AND MEDICAL ASSISTANCE

There are several aid stations along the course. These stations are directly connected to race security headquarters in Chihuahua.

Aid stations are intended to provide assistance to anyone in danger, using the organization's own or public resources. It is the responsibility of any participant in difficulty to request help by:

- Reporting to the next checkpoint.
- Calling the Race Control Center (CC): **+52 33 22 47 10 85**
- Asking another participant to request help.
- Using the SOS function on the LiveRun app. GSM coverage is limited along large sections of the route.

Every participant must assist anyone in difficulty and notify medical or security services.

If it is not possible to contact the Race Control Center, you may call emergency services directly (particularly in areas where only emergency calls are available) by dialing 911.

Any type of incident, related to the environment or the race itself, may justify a delay in assistance. While waiting, your safety depends on the quality of the gear carried in your pack. Participants must rely on their own resources to guarantee their safety.

COMPLAINTS & CLAIMS

Any complaint that involves a change in the classification must be submitted via email within 24 hours after the end of the event.

- Any other complaint must be submitted via email within a maximum of 10 days following the race.
- Any grievance or disagreement related to registration (e.g., a runner not selected in the lottery) or concerning the athletic management of the race and its rules (e.g., if a runner withdraws from the race) are not valid grounds to be considered as a complaint.

> deportes@grupoochoa.com.mx
> competencia@grupoochoa.com.mx

EXCEPTIONAL CONDITIONS

If necessary, the organization reserves the right to modify routes, start times, cut-off times, aid station positions, medical posts, and any other aspect related to the smooth operation of the events at any time. In the event of force majeure, severe weather, or any other circumstance that jeopardizes the safety of participants, the organization reserves the right to:

- Postpone the start of the race.
- Modify cut-off times.
- Change the start date.
- Adapt the race route.
- Cancel the event.
- Neutralize the event.
- Stop the race in progress.

THIRD-PARTY LIABILITY INSURANCE

The organization holds a valid third-party liability insurance policy for the duration of the event. This insurance covers the financial consequences arising from the civil liability of its workers, volunteers, and all participants.

APPENDIX: REGISTRATION TERMS & CONDITIONS

There is an appendix to these Regulations that governs the registration conditions for the event.

PARTICIPANTS´ COMMITMENT

To participate in the **Chihuahua By UTMB® 2026**:

- Be fully aware of the duration and specific nature of the event and be perfectly prepared for it.

- Have acquired, prior to the race, a real capacity for personal autonomy in the mountains to manage the issues caused by this type of event, and in particular:

> Knowing how to face, without outside help, harsh weather conditions at altitude (night, wind, cold, fog, rain, or snow).
> Knowing how to manage, even in isolation, physical or mental problems resulting from extreme fatigue, digestive issues, muscle or joint pain, and minor injuries.
> Being fully aware that the role of the organization is not to help a runner manage these issues.
> Being fully aware that for an activity of this type in the mountains, safety depends on the runner's ability to adapt to encountered or foreseen problems.
> Informing and raising awareness among the members of the runner's crew regarding respect for nature, people, and race regulations.

MANDATORY GEAR & EQUIPMENT

For safety reasons and to ensure the proper conduct of each race, every participant must have the complete mandatory equipment list detailed below at their disposal, and must carry all this equipment—whether in use or not—with them throughout the race.

Participants must present their complete kit for mandatory inspection during Kit Pickup (Bib Collection): for the: **100M, 93K, 58K, 39K,** and **21K** distances.
The **9K** distance will have its mandatory inspection on race day, prior to entering the starting corral.

Systematic and/or random checks will be carried out during the race. Any runners found not carrying all of their mandatory equipment will be penalized or even disqualified (see penalties).

Please keep in mind that the equipment required by the organization is a vital minimum that every runner must adapt according to their own capabilities. In particular, it is best not to choose the absolute lightest garments just to save a few grams, but rather to choose items that truly provide good protection in the mountains against the cold, wind, and humidity, thereby ensuring greater safety and better performance. This list may be modified depending on weather conditions or the environment. Official confirmation of the mandatory equipment will be announced 12 hours before bib collection.

Use of Poles: If you choose to carry poles, you must do so for the entire duration of the race, from start to finish. Starting the race without poles and retrieving them along the course is strictly prohibited. Poles are not allowed in drop bags. The use of poles may be prohibited in certain marked areas for safety or environmental reasons.

NOTES

JACKET RECOMMENDATIONS

***1.** Recommended minimum: 10,000 Schmerber.

***2.** RECOMMENDED RET: UNDER 13.

- The jacket must imperatively have an integrated hood or one attached to the jacket using the original system designed by the manufacturer.
- Seams must be sealed.
- The jacket must not have sections of non-waterproof fabric; however, air vents designed by the manufacturer (under the arms, on the back) are allowed, as long as they do not obviously impair waterproofing.
- It is the runner's responsibility to judge, based on these criteria, whether their jacket complies with the regulations and withstands bad weather in the mountains; however, during a gear check, compliance is evaluated at the discretion of the aid station manager.

***3. ARM AND LEG PROTECTION:**

It is not necessary to wear them, but they must be carried in your pack as protective gear if needed. The purpose of this equipment is to protect against insects, wildlife, or plants on certain sections of the course.

All clothing must be the correct size for the competitor and must not be modified in any way after leaving the factory. Carry this equipment in a pack that must be validated during bib distribution and is not interchangeable during the race.

***4. BASTONES:**

If you choose to carry poles, it must be for the entire duration of the race, from start to finish. It is prohibited to start without poles and retrieve them along the course. Poles are not allowed in drop bags. The use of poles may be prohibited in certain designated zones for safety or environmental reasons.

Maximum required equipment list by distance.

According to the rules, the final list may be adjusted based on weather conditions on race day. This list will be published 12 hours before the official opening of check-in.

TUDOR

BLACK BAY 58

What is it that drives someone to greatness? To take on the unknown, venture into the unseen, and dare all? This is the spirit that gave birth to TUDOR. This is the spirit embodied by every TUDOR Watch. Including the TUDOR Black Bay 58, a 39mm diameter stainless steel diving watch with a Manufacture Caliber and a vintage feel. Some are born to follow. Others are born to dare.

BORN TO DARE

COURSE MARKINGS

For better night visibility, the reference markers feature reflective material that reflects headlamp light. **ATTENTION: If you see no markings, turn back!** Identify the types of official signage used for the Chihuahua race. Along the route, certain sections are shared with trails marked for other sports, such as mountain biking, hiking, etc.

IMPORTANT:

* In order to preserve the environment and promote care for natural surroundings, NO markers are painted on trees or natural surfaces.

*All of our course markers are collected at the end of the event.

*Along the route, you may see trail markers for mountain biking or other races. Make sure to identify our specific markings to avoid confusion with non-event markers.

- **RIBBONS / TAPE**

Ribbons placed on trees, posts, or branches are positioned every 30 to 80 meters and feature reflective material to improve night visibility.

- **DIRECTIONAL MARKERS**

Along the course, you may find signs indicating specific wildlife hazards, as well as warning or risk signs.

- **WRONG WAY SIGN**

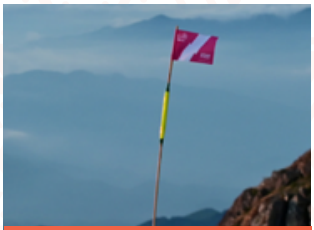

This sign indicates that you are on the wrong route and must return to the last official event marker you saw.

- **CAUTION TAPE**

Tape placed to block access points may be set at waist height or ground level anchored with rocks. Caution tape indicates a blocked or closed path.

- **FLAGS:**

Flags are placed in open terrain or areas with directional changes and feature reflective material.

- **ARROWS**

Indicate route direction or course changes. In certain sections, arrows will feature reflective material.

- **GROUND ARROWS**

Marked using lime or adhesive tape. We do not use paint, nor do we damage urban or natural spaces.

- **KILOMETER MARKERS**

You will find these signs every 10 KM to indicate your accumulated distance.

RACE BIBS

Race bibs are handed out individually to each runner upon presenting:

- A photo ID or passport*
- Mandatory gear and equipment for inspection.

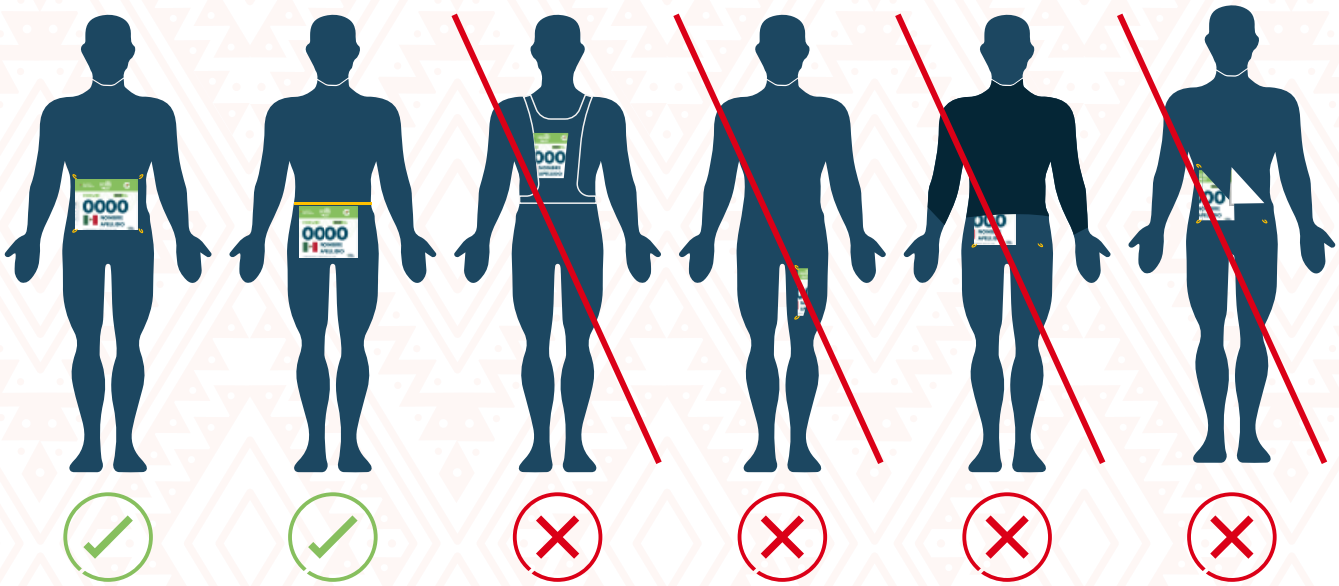

**In case of registration as a Mexican national, a valid Mexican passport or INE must be presented to verify nationality.*

- The bib must be worn on the front, on the chest or abdomen, and must remain fully and permanently visible throughout the entire race.

- To prevent timing system errors, the bib number must be worn over all layers of clothing.

- Modifying or cutting the race number is strictly prohibited and may result in a penalty.

Runners in the **RARÁMURI 100M** and **WERIGA 93K** distances will receive a second chip, which must be attached to their backpack or hydration vest. Nota técnica:

WILDLIFE

WILDLIFE

Remember that nature lends us its environment to enjoy the landscapes and run its trails. We appreciate your support in respecting local wildlife and caring for the environment by disposing of trash only in designated areas at the aid stations.

Along the course, you may encounter species native to the area, and it is important to know how to react to potential risks.

RATTLESNAKES AND OTHER SNAKES

You will pass through areas where you might encounter rattlesnakes. You can identify them visually lying across trails, or by the sound of their "rattle" warning of their presence.

Preventive Measures:

> Always stay aware of the ground you tread on, looking ahead.
> Check areas where you sit down to rest, as well as where your hands and feet touch surfaces.
> Never try to touch or disturb them. Usually, if they are stationary, they will not attack unless threatened. As they hear noise, they tend to move off the path.
> Try to maintain a 2-meter distance.
> They are most commonly encountered during daytime hours on warm, overcast days.
> We recommend wearing protective gaiters or keeping your legs covered; this could mitigate the severity of a bite.

In Case of a Bite:

> Identify and confirm that it was a rattlesnake. If possible, take note of its color and shape, or take a photograph.
> Stay calm and call the organizing committee's emergency number if you are in an area with cellular roaming. Otherwise, inform any runner so they can notify the nearest medical support point.
> Avoid rushing or running to the assistance point.
> Under no circumstances attempt to make incisions, cuts, apply suction, tourniquets, or perform amputations. Wait for medical attention.
> Medical personnel will have the necessary antivenom for treatment based on the evaluation and symptoms of the bite.

EMERGENCY NUMBER:

+52 33 22 47 10 85

SCORPIONS:

Toxic scorpions are present in the area; they are usually found at ground level on loose rocks, fallen leaves, or under tree bark.

Preventive Measures:

> Avoid touching surfaces with bare hands; if you do, be mindful and check before touching.
> Check the area before sitting down or resting on rocky ground.
> Scorpions often camouflage with their environment.
> They are more commonly found at night and in humid areas.

In Case of a Sting:

> Identify the shape and color of the scorpion; if possible, take a photograph.
> Check if the arachnid is brown with dark stripes or solid brown.
> Try to apply a cold compress over the sting.
> Seek immediate help via the emergency number. Head to the nearest aid station or ask a fellow runner to alert staff and medical services.
> Remain calm and head toward the next medical care area
> Medical personnel will have the necessary antivenom for treatment based on the evaluation and symptoms of the sting.

MOSQUITOES AND WASPS

Various species of mosquitoes, wasps, and flying insects exist along the course, especially in tropical and lush canyon areas. Stings or bites could trigger allergic reactions in some individuals.

Medidas preventivas:

> Use insect repellent.
> Cover your limbs with long sleeves, leggings, or long tights.
> Wear a Buff® or balaclava in areas where you detect mosquitoes.
> Mosquitoes are typically found in humid areas or near water sources such as rivers or puddles.

In Case of Mosquito Bites:

> Wash the area with soap and water.
> Aplique una compresa fría.
> Avoid scratching the area, as it could become infected.
> Apply a soothing/cooling lotion to the area.
> Use over-the-counter anti-itch cream or antihistamine to help relieve itching. Consult the medical team.

SAFETY

ARACHNIDS AND ANTS

Most insect bites are mild and can be treated at home. They may cause itching, swelling, and stinging that disappear in one or two days. Some biting insects can transmit bacteria, viruses, or parasites that cause illness. Bites from bees, yellow jackets, wasps, hornets, and fire ants can trigger a severe allergic reaction.

In Case of Bites/Stings:

> Move to a safe area to avoid further bites.
> Remove stingers if they are visible.
> Wash the area with soap and water..
> Apply a cloth dampened with cold water or filled with ice to the bite area; this will help reduce pain and swelling.
> If the injury is on an arm or leg, elevate it.
> Take medication to relieve itching (antihistamine).
> Take a painkiller if necessary.
> Seek medical attention if swelling worsens, if the affected area shows signs of infection, or if you feel unwell. In case of difficulty breathing or chest pain, seek immediate assistance and head to the nearest medical point.

DROP BAG

Drop bag collection for intermediate points on the 100M and 100K distances will take place exclusively at Parque Divisadero - Barrancas on kit drop-off day. No drop bags for intermediate points will be collected at the start locations.

DROPBAG CHECKED BAG	1 Drop Bag & 1 Checked Bag	1Checked Bag

COLLECTION

DIVISADERO

Bib, Kit & Gear Check Collection:
- Collect your Kit (Bib & T-Shirt) in Divisadero.

Check distribution schedules here

Drop Bag Collection (Guitayvo) 100M / 93K
- Hand in your Drop Bag after picking up your bib in Divisadero.

Thursday OCT 1
- 10:00 - 18:00

CEROCAHUI

Gear Check Collection 100M / 93K
- Hand in your Gear Check bag before your start in Cerocahui.

It will be transported to the finish area at Parque Barrancas (No valuables).

Friday OCT 2
- 05:00 - 07:00

DROP BAG USE

GUITAYVO

Drop Bag Use 100M / 100K
- At the Guitayvo Life Base **(62.5 Km/62.5Km)**" you will find your Drop Bag available for use.

RETRIEVAL

PARQUE BARRANCAS

Drop Bag / Gear Check Retrieval:

- Your Drop Bag and/or Gear Check bag will be available in the finish area.

Friday OCT 2
- From 22:00

Saturday OCT 3
- From 07:00

- Bags will only be returned to the runner, family member, or friend upon presentation of the race bib, and must be collected no later than one hour after the official close of the race on Saturday at 17:00.
- Bags from runners who DNF (did not finish/abandon) will be taken to Parque Barrancas and can be collected starting Saturday at 08:00 hrs.
- Only official bags without trekking poles will be transported. No claims for items inside the bags will be accepted, so it is recommended not to store items of value.

AID STATIONS

The organization guarantees solid and liquid aid stations along the entire route. Aid stations will have food and drinks for consumption on-site. The organization provides water and isotonic drinks to refill liquid packs and mandatory personal collapsible cups. It is the runner's responsibility to carry the necessary products before leaving an aid station, planning consumption to reach the next aid station.

Only participants wearing a visible, official, and properly placed race bib will have access to aid stations.

The Runner's Guide and website will provide the exact list of aid stations and their contents. Plan your hydration during the race—as you progress along the course, you should increase your fluid intake. Humidity and heat are factors that could affect your race performance.

HYDRATION

In **RARÁMURI** and **WERIGA** starting from Check Point, you must refill your hydration system to 100% after the La Cruz aid station at km 33, as the next hydration point is 17 km away, with no intermediate hydration point.

After the Panorámica aid station at km 79, we recommend taking precautions, as the climb to the next aid station presents technical difficulty and sun exposure (depending on the time of day you pass through).

Check our website for the type of aid station and its location according to the route.

Liquid Aid Stations:
> Water for refill (E-Pura)
> Isotonic drink (Gatorade)
> Pepsi Cola soft drink
> Coffee / Tea
> Soup

Solid Food Aid Stations:
> Fruits: Orange, banana, watermelon
> Vegetables: Potato and tomato
> Pretzels and Chips
> Energy bars
> Picard chocolates
> Gummy candies
> Dried fruits / Nuts
> Snacks: Ham, cheese, hazelnut cream, and peanut butter

*It is important to include salty options in your hydration strategy. During the race, you lose fluids as well as essential minerals that must be replenished. A lack of mineral salts in the body can trigger serious health issues that could affect your performance. Consuming only sweet products can cause digestive distress.

> Some liquid options will be served directly into your collapsible cup.
> Food and drinks are strictly for consumption within the aid station area.
> Tap water (tap/faucet) in the event areas is not recommended for direct drinking.
> Along certain sections of the course, you will encounter rivers or streams where you can cool off; however, we do not recommend drinking water directly from them, as it could cause digestive issues for some people.

RUNNER TRACKING

LIVE TRAIL

The App functions as a safety platform that provides real-time runner tracking in areas with cellular coverage. In case of an emergency, and depending on network connectivity in the area, the application allows you to send an SMS text alert and the runner's GPS location directly to the Organizing Committee.

Keep in mind that an alert message does not replace a direct phone call to the Organizing Committee if necessary. The GSM network is limited and intermittent—available only at certain points along the route; however, on-course checkpoints will maintain communication with the Organizing Committee's Race Control Center. For the proper functioning of the platform, it is recommended to:

- Keep your mobile phone turned on at all times.
- Ensure the battery is fully charged before starting the race.
- Under no circumstances should you put your phone in airplane mode.
- Verify the mobile phone number provided during registration. This is the number you will use to set up the application.

CHECK POINTS

Along the course, you will find a checkpoint at every aid station. It is MANDATORY to cross every aid station checkpoint, even if you choose not to consume anything there.

Depending on the point, your time registration may be recorded via:
> Electronic timing mats
> Handheld electronic scanner
> Manual logging

REST AREAS

During the race, runners will have access to designated rest areas at select aid stations:

RARÁMURI	WERIGA
CHURO	CHURO
GUITAYVO LIFE BASE	GUITAYVO LIFE BASE

There will be no rest area at Parque Barrancas. Runners who have finished their race and wish to extend their stay must arrange their own accommodation.

RUNNER TRACKING

WITHDRAWAL AND RETURN TO FINISH LINE

Except in cases of injury, a runner may only withdraw from the race at a checkpoint. There, they must notify the checkpoint marshal or send a notification via LiveTrail and inform Race Control. In this case, the runner's bib will be marked as "Withdrawn" (DNF).

If a participant decides to withdraw between two checkpoints, they must reach the next checkpoint to report their withdrawal.

Participants must keep their bib as a pass to access shuttles, transport, meals, medical services, etc.

- Transportation will be available at designated checkpoints—indicated by a "bus" icon on the timetable grids—to return runners to Parque Barrancas.

- Runners who withdraw at any other aid station or checkpoint, and whose health condition does not require medical evacuation, must return as soon as possible and by their own means to the nearest repatriation point.

- Repatriation will be provided by the Organizing Committee under the following conditions:

> Scheduled departures according to previously published timetable

> After a checkpoint closes, the organization may repatriate runners who have withdrawn and have not yet left the aid station.

> In case of severe weather conditions justifying a partial or total suspension of the race, the organization will ensure all repatriated runners are taken to a safe zone as quickly as possible.

RUNNER REPATRIATION

	RARÁMURI	WERIGA
GALLEGO	X	X
LA CRUZ	X	X
GUITAYVO	X	X
SAN ALONSO	X	X
PANORÁMICA	X	X
HUERACHI	X	

At all other aid stations, repatriation will be available but will only operate after the official closing of the aid station. Therefore, runners must wait until that time.

MAXIMUM AUTHORIZED TIME AND TIME LIMITS / CUT-OFF TIMES

The time limit to finish each race is:

- **RARÁMURI 100M:** 30:00 hours
- **WERIGA 93K:** 22:00 hours
- **AKÁA 58K:** 13:30 hours
- **KOMAKALI 39K:** 09:00 hours
- **NAPUREGA 21K:** 04:00 hours
- **NORAWA 9K:** 02:30 hours

*Cut-off times are calculated based on the official start time of the race.

You can find the time limit (cut-off times) to depart main aid stations on our website and in the Runner's Guide. In case of changes (see Exceptional Conditions), new cut-off times will be announced via SMS / text message.

Cut-off times are calculated to allow participants to reach the finish line within the time limit. To be authorized to continue a race, all participants must leave the checkpoint / aid station before the cut-off time (regardless of their arrival time at the checkpoint).

Any participants excluded from the race who wish to continue along the route may only do so after handing in their race bib, at their own risk, and with full autonomy.

FINISH LINE

FINISH LINE

A finisher medal will be awarded to all runners who complete the distance within the established time limit. Finishing runners will have access to a final aid station located at Parque Barrancas, with access restricted strictly to runners and for one-time entry only.

RANKINGS AND AWARDS

In each distance, an overall general award (men's and women's) as well as a 1st place award for each age category (men's and women's) are established (see categories). For each distance, the top 5 men and top 5 women in the general classification will receive a trophy. Trophies and prizes are awarded exclusively during the official ceremony; therefore, the physical presence of the winners is mandatory.

AGE CATEGORY AWARDS

Thank you for being part of the second edition of Chihuahua by UTMB®.
Your presence turns this event into much more than a race: it transforms it into a gathering of cultures, nature, and our shared passion for trail running.

As you run through the imposing Copper Canyon, you are not only facing a physical challenge, but also honoring the heritage of the Rarámuri runners—guardians of these mountains since ancient times. We hope this experience leaves the same mark on you that you will leave on the trails. See you at the finish line... and on the trails yet to be traveled.

The Chihuahua by UTMB® team
